

# New Player Guide

## Help! I just got off the train station and don't know what to do.

1. Finish customizing your character at a **Clothing Store**  and **Barber Shop** 
2. Visit the **DMV**  to complete your driving test and obtain your license. A valid non-expired Driver License is required to buy a vehicle at the dealership.
3. Visit the dealership  to browse the car catalog.
4. Buy a phone at any **Store**  and select a [job](#).
5. Have fun! Make sure to review the [Community Rules](#) before interacting with other players.

## Why am I unable to buy a gun?

New players are unable to obtain a gun license until they have sufficient playtime in the city. As a new player, your focus should be on learning and familiarizing yourself with the basics and game mechanics -- not on killing people.

## I keep getting robbed or killed constantly. What am I doing wrong?

The best way to avoid getting robbed or killed is to avoid high crime areas and the south part of the city.

## How do I create a new character?

There is no such thing as *multiple characters* in this server. For all purposes, players have **one** character and can hold multiple whitelisted jobs without having to 'switch' between different personas. If you misspelled your name, request a name change at the **DMV**  for free! Your character appearance can be fully changed at the **Clothing Store / Barber Shop**.
