

# Dogwalking

To start a dog walking job, open your phone via F1 and click on the Job Center app (JobCentre). From there, navigate to Dog walking and select it. Use F6 and a menu will pop up, giving you an option to 'Get a job'.

Once you've started a job, you will get a GPS location to a house where the dog will await you. Walk the dog in a straight line from the house. Walking the dog around the block will not work. The dog will eventually do it's business and you'll receive a message at the top left of your display telling you to take the dog back home where you will receive payment.

Dogwalking is a **gig job** and can only be done from 9AM to 5PM in-game (local) time.
