

Trucking

To start a trucking job, open your phone via F1 and click on the Job Centre App (Job Centre), type u
Scroll down to Trucking and select it. You will need to have your CDL (Commercial Drivers License)
before you can start a job.

Once you've selected the job, head down to the Trucking depot (Trucking2). Make sure you are
right at the icon, as that is where the starting point is. You will see a white rotating truck icon, go
up to it and you will receive a prompt to press E. The jobs are randomized and you will then be put
into a truck where you will receive a GPS marker to go pickup your cargo. Drive up right behind it
and it will hitch automatically to your truck.

When you are in the truck, you will have access to the CB radio where you can communicate with
other truckers. You have the option to turn it off at the start by pressing E.

From there, you will receive a GPS marker to the location of your drop-off. Once you arrive to the
location, you will see a yellow circle. Drive into the circle so your cargo is right in the middle and
press H to unhitch it. The cargo will disappear, and you will have a prompt take the truck back with
a GPS marker. Park the truck in the yellow circle and get out. After that, you will receive your
payment. Each job pays differently depending on distance.

Having a suspended license will prevent you from starting a trucking job. Watch your
driving.
